REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or adequately teach the instantly claimed reactor comprising, in particular, a pressure relief device connected to the upper end of an inlet chamber that is longitudinally aligned with the longitudinal axis of a reactor body; the reactor further comprising a mixing section connected via a reactant inlet to the inlet chamber, wherein the longitudinal axis of the mixing section is at an angle of less than 90 degrees to the longitudinal axis of the inlet chamber, such that a reactant stream which exits the mixing section enters the inlet chamber at the reactant inlet and flows towards the lower end of the inlet chamber and into the reactor body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
